

***Interactive comment on* “The importance of model resolution on simulated precipitation in Europe – from global to regional model” by Gustav Strandberg and Petter Lind**

Gustav Strandberg and Petter Lind

gustav.strandberg@smhi.se

Received and published: 14 September 2020

By mistake, old erroneous versions of figures 6-9 were included in the manuscript. The correct versions are included below. This does not affect the conclusions, they were based on correct figures. Thanks to Segolene Berthou for noticing this.
