

Dear Dr Hassanzadeh,

We would like to submit the revised version of the manuscript "Intraseasonal variability of ocean surface wind-waves in the western South Atlantic: the role of cyclones and the Pacific South-American pattern" authored by Dalton Kei Sasaki, Carolina Barnez Gramcianinov, Belmiro Castro, and Marcelo Dottori.

The final reviewer's comments pointed to the signal in Table 1 of the correlation between EOF2 v10 and EOF2 swl (0.12). We switched it back to -0.12, which is the correct value. We deeply appreciate all the comments and suggestions, for this reason we added the following sentence to the acknowledgements: 'The authors are also thankful to the anonymous reviewers for their careful reading and relevant suggestions.'

Sincerely,

Dalton Kei Sasaki
